

Temperature sensing just got smaller...

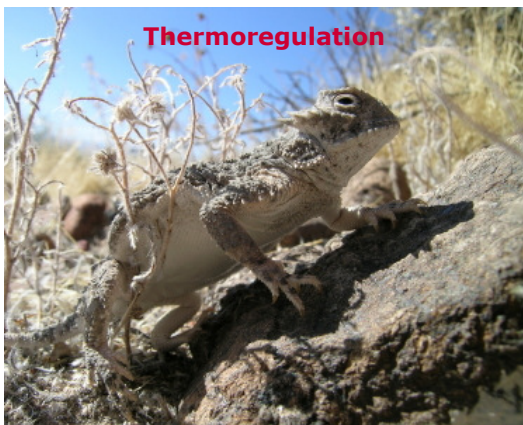

From only **0.36g**

Specialists in Animal Monitoring

...detect **ACTIVITY, MORTALITY** or **BEHAVIOUR**

- **Tailored attachments**
- **Customised for ambient or body temperature sensing**

Tag weight	Cell	Expected lifespan (days)		
		Fast	Standard	Slow
0.36g	Ag337	6	8	12
0.46g	Ag317	9	13	20
0.51g	Ag379	12	16	26
0.70g	Ag376	21	29	45
1.20g	Ag392	32	44	69

Temperature changes the pulse rate, and therefore the lifespan depends on the individual's behaviour.

Expected lifespans are based on fast: 70ppm, standard: 50ppm and slow: 30ppm, all with 20ms pulse length.

Please note, the pulse rates vary continuously but these pulse rates are used to show variation.

Tags can also be customised for shape as all of our tags are made to order. Tag weight varies with antenna length, protection and attachments.
